

Combination Manifold.

Code: [532-136](#)

Product Group: [Pressure plate extractors](#)

This is required to regulate gas pressure source in pressure plate extraction systems.

There are 3 types available to cover all requirements and they enable precise control of pressure.

Pressure manifolds are an essential component in pressure plate extraction systems. They are required to control the air pressure, from a compressor or compressed air vessel, into the extractor. ELE can supply three different types to cover all requirements.

Low pressure manifold: for 0-5 bar systems.

Low to high pressure manifold: for 1-15 bar systems.

Combination manifold: for both 0-5 and 1-15 bar systems running in parallel.

The combination manifold combines both the low pressure and low to high pressure manifolds.

Specification

Pressure Range	1 to 75 psi
Weight	12 kg
Dimensions	685 x 483 x 330 mm

Alternatives

Low Pressure Manifold

Code: [532-110](#)

Low to high pressure manifold.

Code: [532-128](#)
